## Affidavit of Smoke Alarm and Carbon Monoxide Alarm Installation

For Residential Properties

State law requires verification of proper installation of smoke and carbon monoxide alarms whenever a building permit is obtained for any alteration on a residential property. **This form enables a property owner or licensed contractor to self-certify that requirements for these alarms have been met when the building permit is for a project that does not require a building inspector to enter the dwelling to conduct a final inspection.** Examples of such projects are reroofing projects, solar installations, water heater replacements in a garage, and other similar minor improvements that do not require an interior inspection by a City inspector.

### Alarm Model Requirements:

- Alarms must be models approved and listed by the State Fire Marshal, found at: <https://osfm.fire.ca.gov/divisions/fire-engineering-and-investigations/building-materials-listing/bml-search-building-materials-listing/>
- The devices must be installed according to the manufacture's instructions.

**Instructions:** BEFORE you request an inspector to sign off on your project, complete and sign this affidavit and return it back to the City of Orland Building Department.
